Sexy shoes can be torture. Because the higher the heel the greater the pressure on the forefoot. Ouch! pedag gel pads offer welcome relief:

- ✓ Maximum softness in comfort
- ✓ Anatomically moulded
- ✓ Highly self-adhesive = no slipping
- ✓ Invisible
- ✓ For all shoes and sandals
- ✓ One size fits all

HIGH LIFE gel half-sole

Art. 171

- The all-round solution for every customer
- Cushions the sensitive ball
- Prevents burning feet
- Simple to position
- Also prevents slipping in the shoe

Insertion tip:

Maximum effect is achieved when the two spotted outer markings on the half-sole are lightly touching the inner lining of the shoe.

FEEL GOOD gel metatarsal pad

Art. 173

- Ideal if there is little space in the shoe
- Supports the metatarsal arch
- Recommended for particularly stressed balls of the feet
- “Cushioning leaves” at the side and front for sensitive metatarsophalangeal joints
- Soothes painful feet

The front edge of the metatarsal pad lies approximately in the area in which the ball is at its widest. For easy insertion:

1. The packing includes a practical stencil.
2. You can insert the pad again after taking it off carefully.

Patent pending

How does pedag FIXI differ from the two above-mentioned gel pads?

1. Function: FEEL GOOD and HIGH LIFE are ball cushions for soothing the pressure. **FIXI acts as an anti-slip protection in the shoe.**

2. Application: FEEL GOOD and HIGH LIFE are provided with a strong adhesive underside, so that they do not slip in high heels either. You can adjust the position, but to switch them from shoe to shoe isn't convenient.

FIXI is slightly adhesive on the topside and underside:
 - on the top so that you don't slip in the shoe
 - underneath so that FIXI can be switched from shoe to shoe.
 Tip: If adhesion diminishes, simply rinse under clean water.

3. Material: All three products are manufactured from an innovative gel:
 • **Dermatologically tested** → according to the Institut Fresenius test, the gel is suitable for prolonged direct contact with the skin even for those with sensitive skin.

• **Manufactured in accordance with Öko-Tex standard 100** → i.e., these gel products have been tested for harmful substances and conform to current applicable standards relating to baby articles.

• **No plasticisers / softeners used**
