

Hard concrete floors, long hours spent standing and walking, high heels and being over weight lead to foot problems and deformation in about 80% of the population and encourage the formation of splayed feet. And it's no wonder, since the foot consists of 26 bones that form a sensitive, highly complicated supporting apparatus.

Viva

Insoles by Pedag provide anatomical support for the longitudinal and latitudinal arch. This helps relieve problems and prevents the arch from dropping any further. Insoles by Pedag are especially thin and light, and so will fit inside almost any shoe.

APMA Approved Pedagog Insoles

VIVA Art. 187/188 *

Orthopedic design. Prime quality cowhide, tanned with herbal extracts for the optimum foot climate. Special Carbon filter stops odors. Metatarsal pad prevents & alleviates symptoms of splayfoot. Anatomically shaped Footbed takes the strain off the arch and the ball of the foot. Antibacterial & extremely hygienic. Extra soft heel pad relieves pressure & impact on the heel. One of the thinnest orthopedic type insole available on the market. Fits in any shoe. Sanitized

SOLAR PLUS Art. 198 *

Full length, 3-layer, Thermo Active foot bed, for winter shoes & boots. Layers of pure unbleached wool that absorbs moisture while keeping your feet warm, high tech foam and an aluminum foil layer insulates against cold from the ground. Metatarsal pad prevents & alleviates symptoms of splayfoot. Anatomically shaped Footbed takes the strain off the arch and the ball of the foot. The soothing heel pad acts as a shock absorber.

MASTER Art. 186 *

Full Length Semi-Rigid Footbed. Made of Compressed Jute Felt which is absorbent and non-abrasive. Latex Free charcoal filter prevents odor. Especially for work boots, leisure boots and athletic shoes. Metatarsal pad prevents & alleviates symptoms of splayfoot. Anatomically shaped Footbed takes the strain off the arch & the ball of the foot. Antibacterial & extremely hygienic. Extra soft heel pad relieves pressure & impact on the heel. Sanitized.

HOLIDAY Art. 17992 *

Ultra light 3/4 Semi-Rigid Footbed stimulates tired feet. Made of sheepskin for optimum breathing. Metatarsal pad prevents & alleviates symptoms of splayfoot. The arch support helps the longitudinal arch and relieves stressed feet. Extra soft heel padding for comfort. One of the thinnest orthopedic type insole available on the market. Fits in any shoe.

COMFORT Art. 142

3/4 Length insert with Vegetable Tanned Leather is specifically designed for severe flat feet. The T-form Metatarsal pad prevents & alleviates symptoms of splayfoot. Extra soft heel padding for comfort. Ideal to wear in any flat shoes or pumps. Sanitized

Vitality Art. 18306 *

Full Length Footbed that is ideal for leisure & sports shoes. Absorbent cotton terry & naturally breathing sisal fibers keep your feet fresh. Metatarsal pad prevents & alleviates symptoms of splayfoot. Anatomically shaped Footbed with longitudinal arch support provides relief for the "critical" areas of stressed feet. The heel pad absorbs impact during walking. Sanitized

BAMBINI Art. 192

3/4 Length Children's Footbed with Vegetable Tanned Leather. The Footbed is flexible and highly adaptive which strengthens the foot's muscular apparatus. Keeps foot in a natural balance, protects ankle joint, counteracts deformation of the longitudinal arch.

Pedagog has been manufactured in Germany since 1955. Pedagog works almost exclusively with top quality, actively breathing, natural materials such as vegetable tanned leather, pure wool, cotton, sisal, charcoal and cork. These materials will absorb moisture leaving your feet dry and fresh. Pedagog's semi-rigid, polypropylene, orthopedic foot beds, developed in cooperation with sports physicians and orthopedists, are designed to relieve and prevent many common foot problems. Pedagog is proud to have earned the American Podiatric Medical Association Seal of Acceptance for all the insoles discussed in the brochure.
