

Pedag Aloe Vera

Pedag Aloe Vera: Do something good for yourself.

- A cushion for the sensitive foot
- Made of soft, absorbent microfiber velours and soft latex foam
- With extracts of aloe vera

For Silky-smooth and Comfortable Walking because:

- Velvety microfiber velours indulges the foot and absorbs moisture
- Natural aloe vera extracts nourish the skin

Aloe Vera – the renaissance of a traditional medicinal plant

History

- In ancient Egypt aloe was considered to be a giver of beauty, health and immortality
- In ancient China aloe was regarded as a godly plant
- The native Americans counted aloe among 16 holy and revered plants
- Even today for the nomads of Africa it remains the "lily of the desert"
- In America it is also called "The Silent Healer", or "Doctor Aloe"

Properties attributed to the aloe vera plant

Aloe Vera belongs to the lily family although it looks more similar to a cactus.

By acclimatising to its surroundings in the subtropics (e.g. India, Brazil, Mexico, USA etc.) it can survive for many months without rain. It stores water in its fleshy leaves, closes its leaf pores and avoids drying out.

The cosmetics and pharmaceutical industry are principally using two particular properties of aloe:

- a) the ability of aloe to store water
- b) the abundance of valuable ingredients contained in the transparent gel of the leaves. (Minerals, vitamins, enzymes, amino acids etc.)

Aloe vera can be particularly effective in:

- Boosting the immune system
- Acting as an anti-inflammatory, antibacterial, stypic, pain-killing and soothing agent, as well as a healing agent on wounds
- Stimulating and improving cell renewal
- The exchange of metabolic products via the pores of the skin instead of through the bloodstream.
